

Name _____

Date _____

1. Find the total volume of the figures and record your solution strategy.

a.

Volume: 72 in^3

Solution Strategy:

Volume of A = $13 \text{ in} \times 2 \text{ in} \times 2 \text{ in} = 52 \text{ in}^3$
 Volume of B = $2 \text{ in} \times 5 \text{ in} \times 2 \text{ in} = 20 \text{ in}^3$
 Total = $52 \text{ in}^3 + 20 \text{ in}^3 = 72 \text{ in}^3$

b.

Volume: _____

Solution Strategy:

Volume of C = $2 \text{ cm} \times 18 \text{ cm} \times 3 \text{ cm} = 108 \text{ cm}^3$
 Volume of D = $7 \text{ cm} \times 21 \text{ cm} \times 9 \text{ cm} = 1,323 \text{ cm}^3$
 Total = $108 \text{ cm}^3 + 1,323 \text{ cm}^3 = 1,431 \text{ cm}^3$

c.

Volume: $72 \text{ mm}^3 + 132 \text{ mm}^3 + 45 \text{ mm}^3 = 249 \text{ mm}^3$

Solution Strategy:

$V_E = 3 \text{ mm} \times 4 \text{ mm} \times 6 \text{ mm} = 72 \text{ mm}^3$
 $V_F = 11 \text{ mm} \times 3 \text{ mm} \times 4 \text{ mm} = 132 \text{ mm}^3$
 $V_G = 3 \text{ mm} \times 3 \text{ mm} \times 5 \text{ mm} = 45 \text{ mm}^3$

d.

Volume: $432 \text{ m}^3 + 40 \text{ m}^3 = 472 \text{ m}^3$

Solution Strategy:

$V_H = 12 \text{ m} \times 9 \text{ m} \times 4 \text{ m} = 432 \text{ m}^3$
 $V_I = 10 \text{ m} \times 2 \text{ m} \times 2 \text{ m} = 40 \text{ m}^3$
 15m - 9m gives the height of I.

2. A planting box (pictured below) is made of two sizes of rectangular prisms. One type of prism measures 3 inches by 6 inches by 14 inches. The other type measures 15 inches by 5 inches by 10 inches. What is total volume of three such boxes?

Left and Right sides: $(3\text{in} \times 6\text{in} \times 14\text{in}) + (3\text{in} \times 6\text{in} \times 14\text{in})$

$$= 252\text{ in}^3 + 252\text{ in}^3$$

$$= 504\text{ in}^3$$

Middle: $15\text{ in} \times 5\text{ in} \times 10\text{ in}$
 $= 750\text{ in}^3$

$$\begin{array}{r} 750\text{ in}^3 \\ + 504\text{ in}^3 \\ \hline 1254\text{ in}^3 \end{array}$$

is volume of one box

$$1254 \times 3 = 3762$$

Total volume = 3,762 in³

3. The combined volume of two identical cubes is 250 cubic centimeters. What is the measure of one cube's edge?

$$5\text{ cm} \times 5\text{ cm} \times 5\text{ cm} = 125\text{ cm}^3$$

The edge of one cube is 5 cm long.

4. A fish tank has a base area of 45 cm² and is filled with water to a depth of 12 cm. If the height of the tank is 25 cm, how much more water will be needed to fill the tank to the brim?

$$V_{\text{water}} = 45\text{ cm}^2 \times 12\text{ cm}$$

$$= 540\text{ cm}^3$$

$$V_{\text{tank}} = 45\text{ cm}^2 \times 25\text{ cm}$$

$$= 1,125\text{ cm}^3$$

$$\begin{array}{r} 1,125\text{ cm}^3 \\ - 540 \\ \hline 585\text{ cm}^3 \end{array}$$

585 cm³ more water is needed.

5. Three rectangular prisms have a combined volume of 518 cubic feet. Prism A has one-third the volume of Prism B, and Prisms B and C have equal volume. What is the volume of each prism?

$$7\text{ units} = 518\text{ ft}^3$$

$$\div 7 \quad \div 7$$

$$1\text{ unit} = 518 \div 7$$

$$= 74\text{ ft}^3$$

$$A = 74\text{ ft}^3$$

$$B = 74 \times 3 = 222\text{ ft}^3$$

$$C = 222\text{ ft}^3$$
